

Palau de Congressos de Palma

Managed by Meliá Hotels International

Welcome

Palau de Congressos de Palma

Managed by Meliá Hotels International

Welcome to the *Palau de Congressos*, the congress center of Palma de Mallorca. Unique architecture and a marvelous location in the most envied destination of the Mediterranean, provided by the leaders in hotel management, Meliá.

Palma, Mallorca, the Mediterranean

The old town of Palma has constructions that date back to the XIII Century. The baroque and gothic style predominate in the center, which has been listed as the second largest in Europe after Rome. It has a religious heritage of invaluable beauty such as the Palma Cathedral, of gothic style built on roman walls which protected the city, declared artistic monument in 1931. Numerous art galleries occupy the small streets where one should not miss discovering and savoring the excellences of Majorcan gastronomy.

The *Palau* finds itself 15 minutes walking distance from the old town and the Cathedral, and 5 minutes away from the Palma International Airport which has direct connections to the main Spanish and European cities.

Unique architecture

The structure of this building was conceived by **Patxi Mangado**, an internationally renowned architect from Navarra who defines himself as a man in love with the light of Mallorca and the Mediterranean. His latest prize was the 2017 Art Award granted by the Academy of Arts of Berlin which acknowledges his trajectory as an architect and spotlights projects such as the complex formed by the congress center *Palau de Congressos* of Palma and the hotel Meliá Palma Bay, among others.

The *Palau de Congressos* of Palma is built as a continuation of *Baluarte*, a wall that fosters and encloses the charms of a city that is constantly being reborn to the Mediterranean light and the breeze of the sea. This has significantly influenced the choice of materials for the creation of this building.

The architect:
Francisco Mangado

Among Francisco Mangado's main works are, the *Centro de Cultura e Iglesia* in Thiene (Italy, 1996), the *Palacio de Congresos y Auditorio* of Pamplona (2003), the *Pey Berland* square in Burdeos (2004), the *Centro Municipal de Exposiciones y Congresos* in Ávila (2009), the *Museo de Arqueología de Vitoria* (2009), the *Campo de Fútbol* of Palencia (2006), the *Pabellón de España* for the *Expo Zaragoza* (2008), the *Auditorio de Teulada* (2011), the *Palacio de Congresos* of Palma de Mallorca (2016), the *Museo de Bellas Artes de Asturias* in Oviedo (2015) and a tower of offices in Buenos Aires (2008). Prize to Spanish Architecture 2017 to the *Palau y Hotel Meliá Palma Bay* complex.

At first view, the *Palau de Congressos* of Palma evokes a hive inside which you can find two magnificent auditoriums with a capacity for 1.966 and 471 people respectively, fully equipped with the latest technology to host all kinds of events, both cultural such as concerts and shows, as well as congresses, meetings, fairs and events. It has a large exhibition area which resembles a cave open towards the sea allowing the Mediterranean light to enter through its large windows, various fully functional meeting rooms of different sizes and an impressive terrace of over 600 m² with incomparable views to the Palma Bay.

The materials used in the construction of the building are remarkable helping it be a sustainable building.

The architectonic panels ALUSION™ stand out on the Palau's facade. They have been fabricated by means of an injection of air in melted aluminum which contains a fine dispersion of ceramic particles. These particles stabilize the bubbles formed by the air in the same way that dry cocoa stabilizes the bubbles when milk is added.

Both auditoriums offer excellent acoustics designed by the prestigious office HIGINI ARAU, international expert in the field of acoustic architecture.

The wood used was brought from Africa; PADAUK, a tree which can grow to reach up to 40metres high. Its wood is highly appreciated due to its hardness, although it's easy to mold. Initially it is red but turns brown when exposed to the light.

AUDITORIUM ILLES BALEARS TOTAL CAP: 1.966

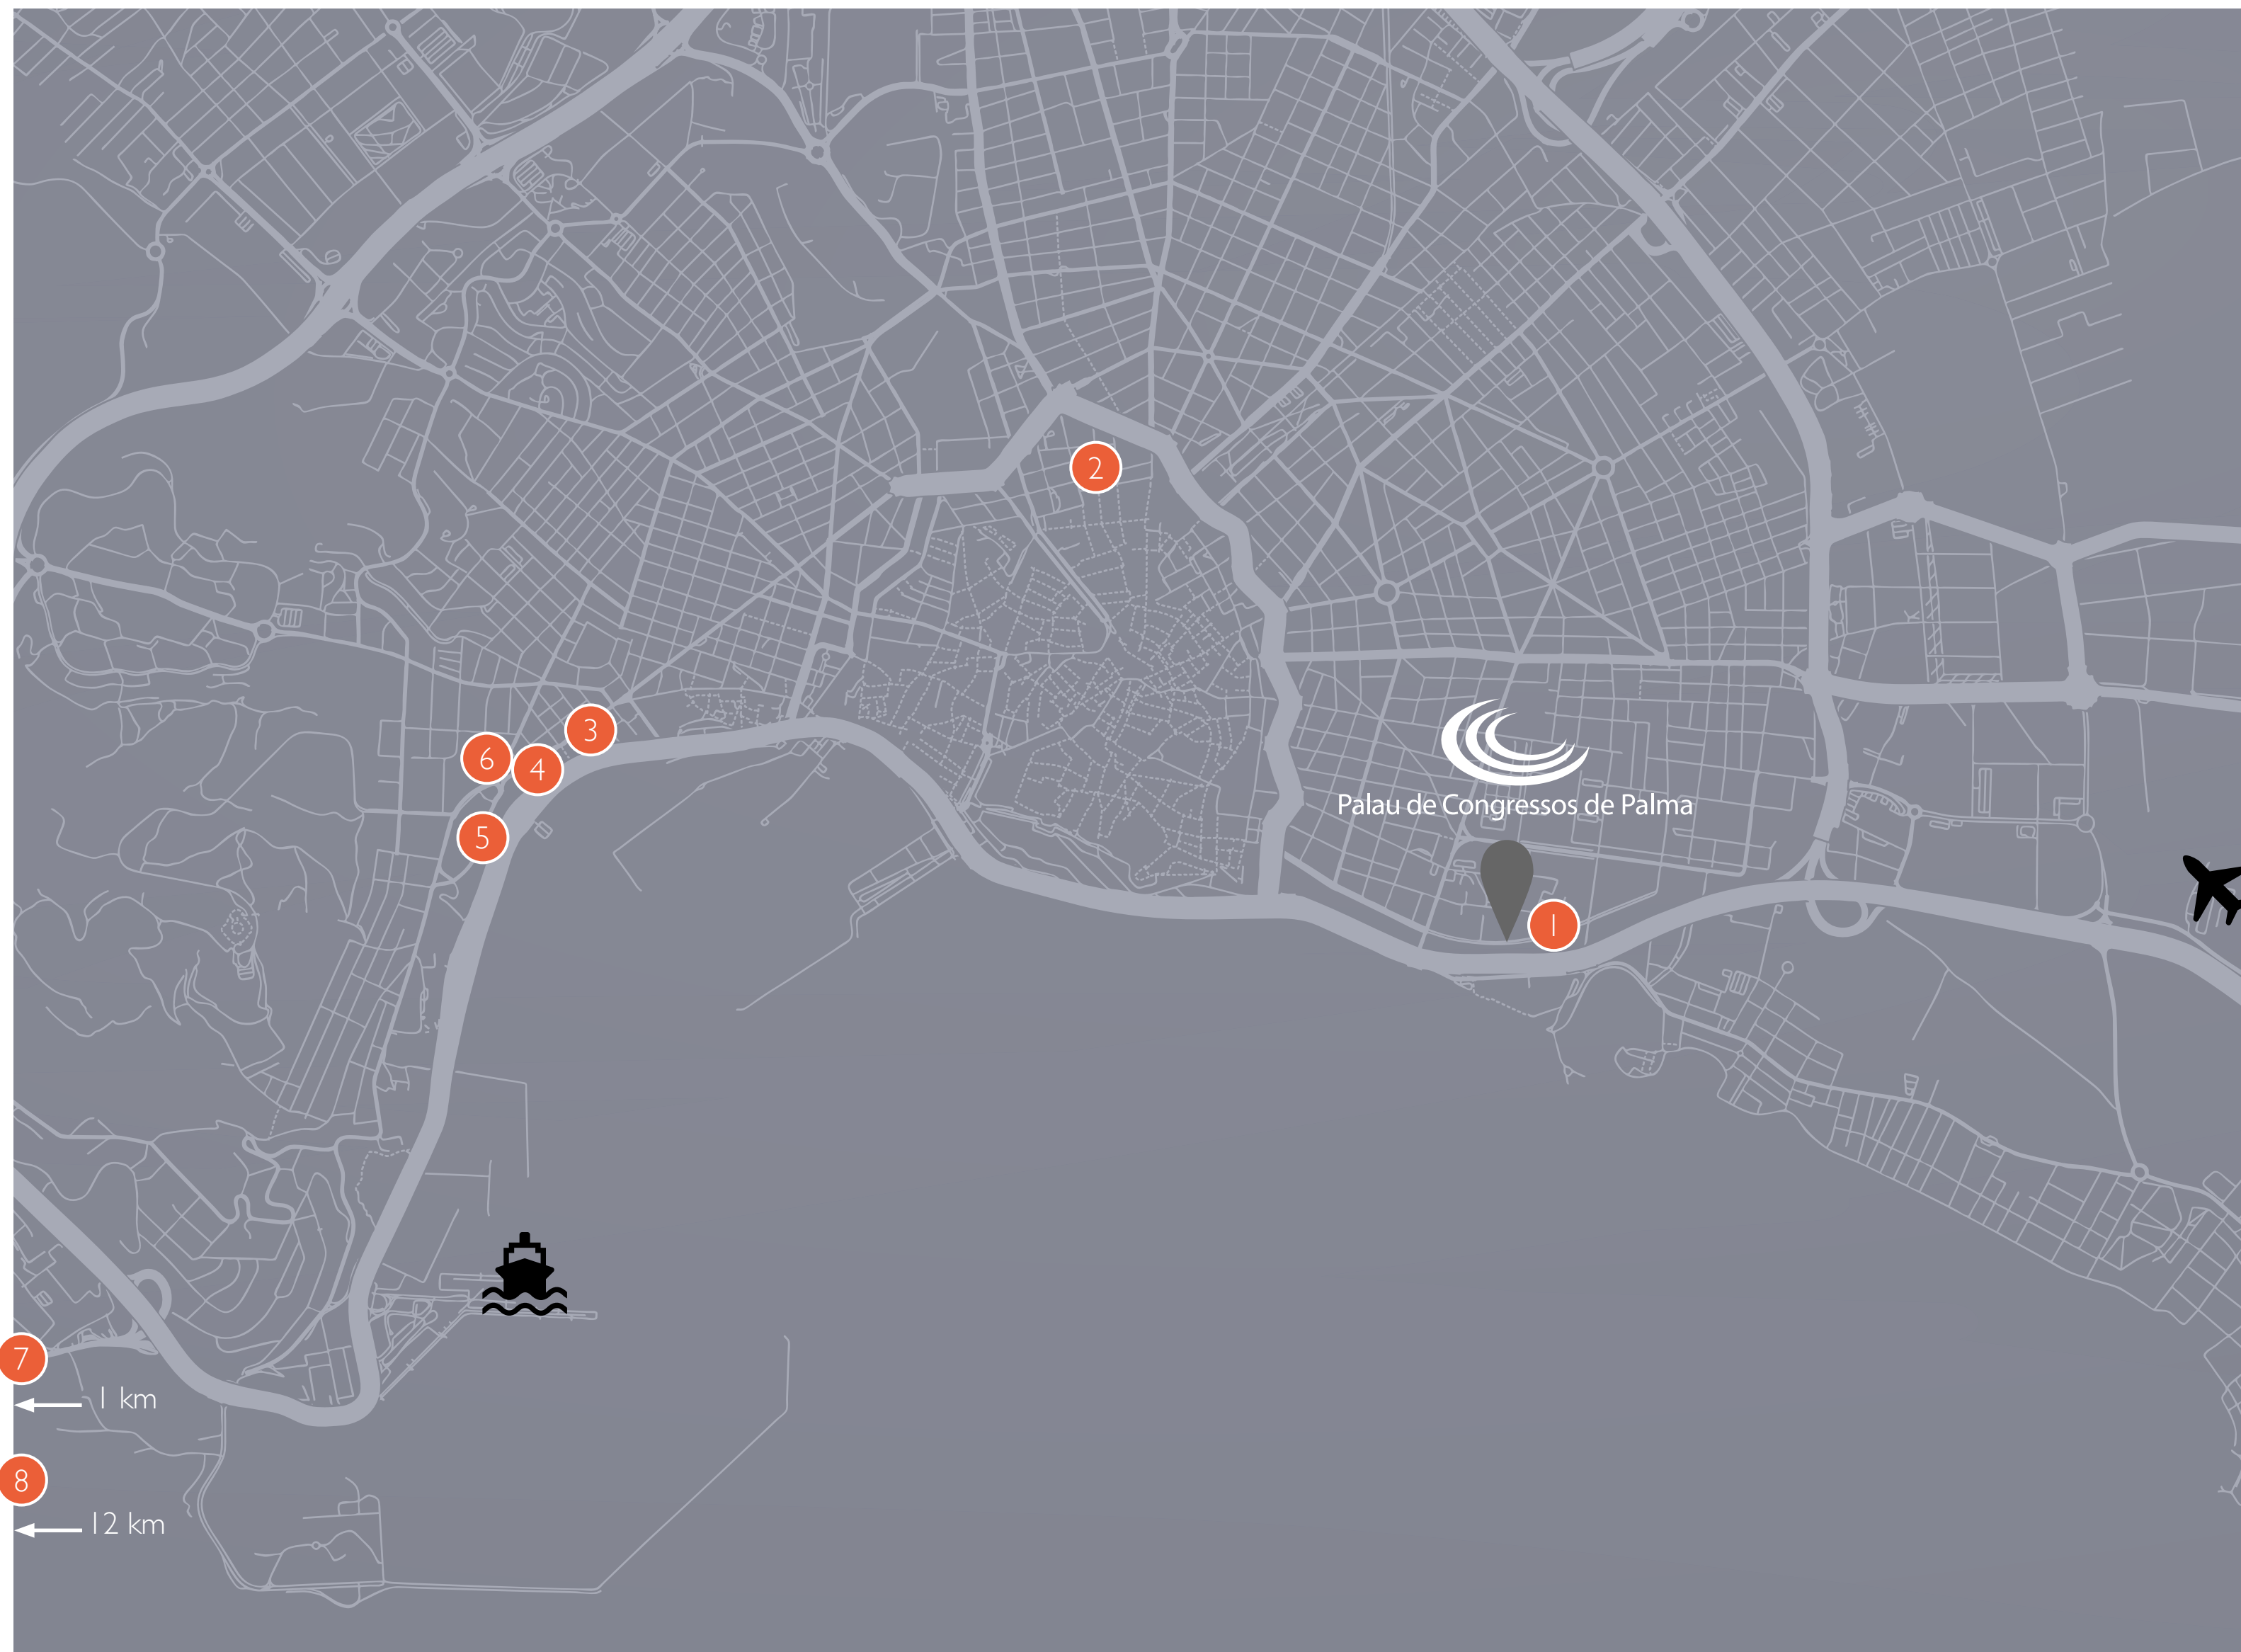

Value with flavour

The *Palau de Congressos* of Palma managed by Meliá Hotels International, relies on the experience of its own great professional team for the organization of all sorts of events, offering a broad selection of business lunches, healthy coffee breaks, gala dinners or cocktails and ensuring impeccable care on every detail.
