COPENHAGEN

IS BEST IN TRAVEL 2019!

The avid travelers at Lonely Planet have asked themselves “which cities are the best to visit right now?” and have decided that Copenhagen is #1. And we could not agree more!

On the food scene, new food markets and casual dining hotspots are popping up all over the city. Innovative design, green oases and clean waters make Copenhagen a sublime place to live and to visit. Copenhageners excel in combining sustainable solutions with growth and a high quality of life. Finally, we are experts in ‘hygge’ and are known for being the world’s most happiest population.

#CONTRAST

In contrast lies the unexpected, the unique composition of our physical surroundings and the diverse group of people working within, staying at or visiting Villa Copenhagen.

Villa Copenhagen is a reflection of a city that exudes sustainability, luxury, happiness and diversity, a city and thereby a hotel with room enough for everyone – both literally and figuratively speaking.

#HAPPINESS

Danes have long been known for being the happiest people in the world. The Danish unpretentious approach to life, the ability to find joy in the smaller things and the appreciation of luxury in the shape of time, freedom, and quality. We embody this view on the world and our courtesy and service reflect this. We are present and service-minded but not be intrusive. The atmosphere of the hotel is vibrant and friendly, polite and personal, humorous and accommodating.

#CONSCIOUS LUXURY

Conscious luxury, as we call it, is about enjoying everything life has to offer from unique experiences and unexpected encounters, to quality food and inspiring surroundings, while at the same time taking responsibility for our actions and our impact on the planet. Acting responsibly is part of our DNA. We take full responsibility for our impact on the planet, therefore, The UN Sustainable Development Goals (SDG's) is an important element is our value of conscious luxury.
