SEVILLE

Sevillian architecture: pure magic all day long

Located in the heart of Seville's old town, this traditional Sevillian-architecture building used to be a local neighbors' courtyard in the 18th century. Today, it is an ideal setting for guests to relax, imagine and dream. Inside, the contrasts are everywhere and emotions run wild. The colors and the aromas of the central courtyard evoke activity and energy. The stone, clay and chalk used in the building's construction give it a touch of authenticity and a high architectural and historical value.
